

Ideas for Technology Integration

1. Utilize a PowerPoint presentation to give notes over dance history (*ballet history has been included in these files*).
2. Record students as they perform skills tests. Re-play it for them and ask that they critique their own performance using a given rubric.
3. *For Advanced Dance Class*) Have students create a piece of choreography for your dance class show designed to integrate a PowerPoint as the background to their dance.
4. Using a PowerPoint, create a jeopardy game for review of terminology and/or history notes.
